Profile

AI Engineer focused on building hardened, trust-first AI systems. I specialize in bridging the gap between research and production designing measurable evaluation rubrics, debugging across the full stack, and owning the lifecycle of features that survive real-world usage constraints in ML.

Technical Skills

MLOps & Cloud: Kubernetes, ArgoCD, Docker, OTEL, GitLab, CI/CD, GCP

ML Frameworks: PyTorch, MMDetection, Scikit-learn, CUDA Python

Generative AI: LangGraph, RAG Pipelines, vLLM, Ollama, LoRA/QLoRA, Prompt Tuning, Fine-tuning

Backend & Data: Python, C++, TypeScript, FastAPI, MongoDB, BigQuery, Redis, Pinecone

Experience

Flipkart 2026, August – present
AI Engineer 2 Bengaluru

Nextiva 2025 – 2026, August
AI Engineer Bengaluru

- **Agentic Search:** Agent creation for on boarding customers with Websearch and reasoning.
- **LLM Evals & Benchmarking:** Curated ground-truth datasets and engineered an automated eval framework to score LLM outputs, preventing prompt regressions before production.

Infosys 2021 – 2025
Specialist Programmer L3 (AI/ML) Bengaluru

- **Multi Agent Systems:** Engineered a multi-agent Log Analyzer for GE industrial systems to perform automated Root Cause Analysis on unstructured data.
- **Retrieval & RAG Systems:** Developed and rigorously evaluated document retrieval systems (enterprise data), building evaluation frameworks to measure subjective relevance.
- **Computer Vision:** Worked in R&D team to curate datasets and fine-tune models across OCR, object detection, image classification, and segmentation tasks.

AICrowd Jan 2021 – Apr 2021
Research Fellow Computer Vision Remote

- Conducted **Cutting-Edge Research** to develop a SOTA CV pipeline; translated complex biological challenges into a scalable **Computer Vision solution** deployed across African regions.

Education

IIT Guwahati 2019 – 2021
MTech, E&C

NIT Raipur 2014 – 2018
BTech, E&C

Achievements

3rd Place: **NeurIPS 2024** (NMMO RL)

Finalist: **Meta Hacker Cup 2024**

3rd Place: **CVPR 2024** (VAND 2.0)

3rd Place: **Amazon SUADD23**

2nd Place: **NVIDIA** Object Tracking

Publications

P. Saidinesh, et al. ‘Low Overhead Interdependent Source-Channel Coding,’ IEEE GCON 2023.

J. Suárez (incl. **Saidinesh Pola**), ‘Results of the NeurIPS 2023 Neural Agents Competition,’ arXiv:2508.12524.
